STATE MANDATES

Tdap: one dose of tetanus, diphtheria and pertussis vaccine is required for all students entering the 7th grade beginning with the fall semester of the 2011-2012 school year. Proof of immunization must be submitted before a student is allowed to enter the seventh grade; no grace period is allowed.

S.B. 1876 Physical Education effective 11-1-2010: provides for the implementation of a sequential, developmentally appropriate physical education curriculum and requires that at least fifty percent (50%) of physical education activities be performed at a moderate or vigorous level.

S.B. 1700 Sports Related Injuries effective 7-1-2010: provides for the development and implementation of guidelines for school personnel and student athletes related to sports related head injuries. The law directs each local school board to work in cooperation with the Oklahoma Secondary Schools Activities Association (OSSAA) to develop guidelines, notification procedures, and other pertinent information and forms regarding the risk of concussion and head injury for student athletes. Additional language provides for the removal from participation of student athlete and requirements to return to play for the athlete who sustained a head injury.

S.B. 1186 Additional 60 Minutes of Physical Activity Requirement beginning with the 2008-2009 school year: requires that public elementary schools provide to students in full-day Kindergarten and Grades one through five an average of an additional 60 minutes of physical activity each week, which may include, but not be limited to, physical education, exercise programs, fitness breaks, recess, classroom activities, and wellness and nutrition education.

H.B. 2239 Self-Administration of Anaphylaxis Medication effective 9-1-2008: permits the self-administration of anaphylaxis medication by a student for treatment of anaphylaxis. Directs local school boards to adopt a policy permitting the self-administration of inhaled asthma medication by a student for treatment of asthma.

S.B. 923 Automated External Defibrillators effective 7-1-2008: mandates that automated external defibrillators (AED) be made available at schools <u>if funding is available</u>. Purchase of defibrillators is contingent upon the availability of federal funds or donations from the private sector. The school district may make AED units available at athletic practices or competition in the district.

S.B. 1459 Healthy and Fit School Advisory Committee effective 9-1-2006: in order to assist the Healthy and Fit Advisory Committees in formulating recommendations about

the health and physical activity of students, this bill directs the State Department of Education, in consultation with the State Department of Health, to make available to schools information and technical assistance for use in establishing healthy school nutrition environments, reducing childhood obesity, develop quality physical education and activity programs, preventing diet-related chronic diseases, and establishing, implementing, and evaluating school wellness policies.

S.B. 312 Physical Education effective 11-1-2005 with requirements beginning with the 2006-2007 school year: school districts, as a condition of accreditation, must provide physical education programs to all students, which may include athletics. Also, elementary schools are required to provide instruction on physical education or exercise programs for students in full-day Kindergarten through Grade 5 for a minimum of 60 minutes per week.

S.B. 1627 The Healthy and Fit Kids Act effective 9-1-2004: provides for a Healthy and Fit School Advisory Committee to be established at all public school sites. The committee shall study and make recommendations to the principal regarding health education, physical education, physical activity, nutrition, and health services.

S.B. 1795 Vision Screening effective 7-1-2007: formulation of a Vision Screening Advisory Committee; state mandate requiring that the parent or guardian of each student enrolled in Kindergarten, 1st or 3rd grade at a public school shall annually provide certification to the school that the student passed a vision screening exam within the previous twelve months or during the school year. Such screening shall be conducted by personnel listed on the statewide registry as maintained by the State Department of Health.

H.B. 1051 Diabetes Management in Schools Act effective 7-1-2007: state mandate which encourages each school in which a student with diabetes is enrolled to ensure that either a school nurse or a volunteer diabetes care assistant is available to assist the diabetic student when needed. This law requires that a diabetes medical management plan be developed for each student with diabetes and for the State Department of Health to develop guidelines and supervise the training of the volunteer diabetes care assistant. The State Department of Education helps to facilitate the training by arranging for facility usage at eight different geographic locations throughout the state and by giving technical assistance during the training sessions. The training sessions are given annually.

Oklahoma Health Improvement Plan (OHIP): the plan was mandated by the Oklahoma Legislature in 2008 directing the State Board of Health to prepare a report that outlines a plan for the improved health of all Oklahomans through the public health system. OHIP addresses, among other things, improving health outcomes through targeted areas of children's health improvement, tobacco use prevention, and obesity reduction. Attend quarterly meetings.
