

New OKHOUSE.GOV Menu

Below is a screen shot of our external website, www.okhouse.gov, showing the new menu #1 below.

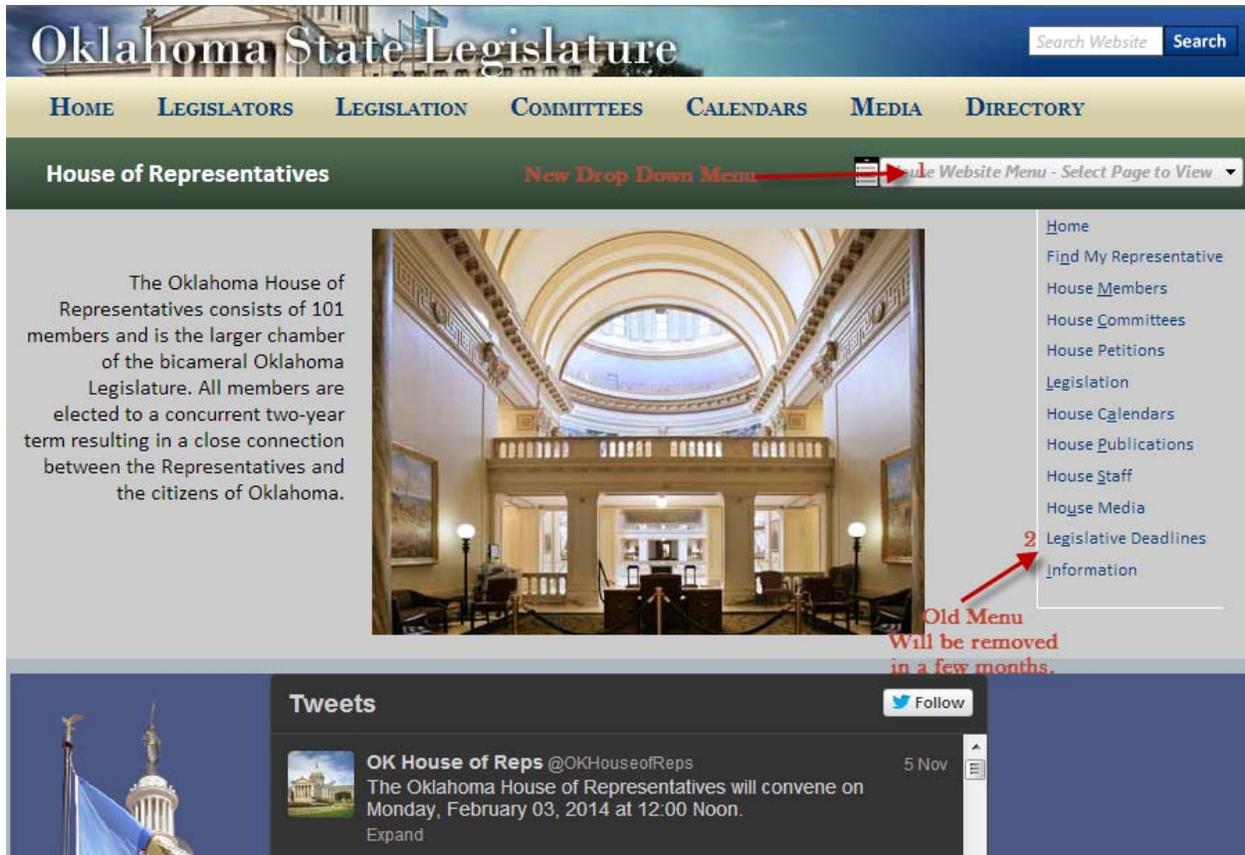

Figure 1

Item #1 above is a new drop down menu which will replace our old side menu #2 above. The new drop down menu will provide the following advantages which will be explained in later screen shots.

1. The new drop down menu when it finally replaces the old side menu will allow more space for tabs, grids, and text.
2. The new drop down menu will show you what screen you are currently viewing in the hierarchy of pages on our website.
3. The new drop down menu will let you expand menu items to select the actual page that you wish to view.
4. The new drop down menu will allow you to search for the page you are looking for and then display the pages found per your search request and you can then select the page you are looking to view.

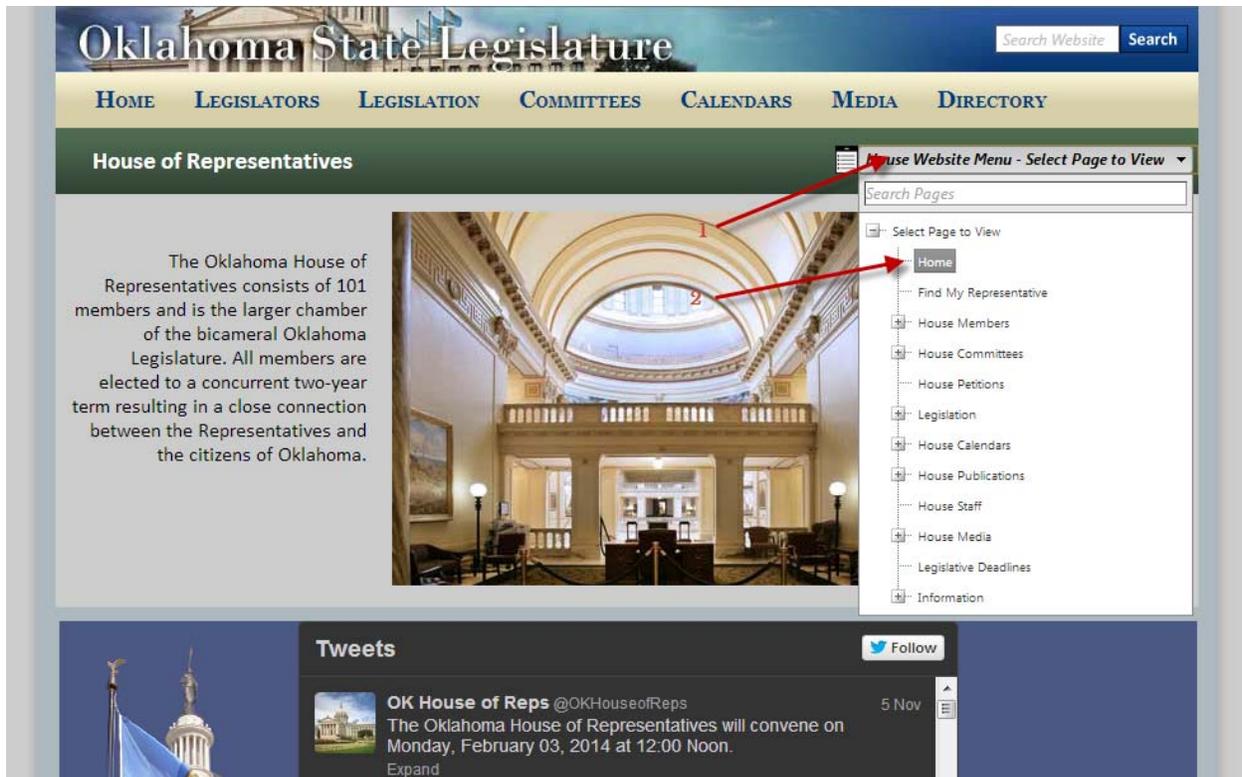

Figure 2

In figure 2 above you can click on the drop down menu, item #2, either the down arrow on the right side or on any of the text displayed "House Website Menu – Select Page to View". The drop down menu will then be displayed showing you the menu structure for the website and the highlighted menu item, item #2, is the page you are currently viewing. You can expand the menu items with a "+" plus sign and the subpages for that menu items will be displayed as shown in figure 3 below.

If you are using Internet Explorer (IE), then you can also access the new drop down menu by pressing the "Alt + M" keys together. This will highlight the drop down menu. Use the "Alt + DownArrow/UpArrow" to open/close the dropdown or the Esc key (to close the dropdown when opened). Once the dropdown is opened you can move the focus to the filter field and then to the nodes by using the "Tab" key. If you need to expand the menu item then use the "RightArrow" key. You can use "Shift + Tab" to move backward. The menu item to be selected will have a box with a dash border around it. It will not be the highlighted menu item. You can move the highlighted menu item using the "Arrow" keys but this will not be the menu item selected when pressing the "Enter" key. If you don't see a box with a dash border around a menu item then you need to press the "Tab" key once or twice. Once you have the menu item selected then press the "Enter" key. In figure #3 below you can see the key combinations for the different browsers. Some support the access key and some don't. The access key is the "M" key.

Key combinations supported by different browsers

Browser	Focus	Navigation Forward	Navigation Backward
Internet Explorer	Alt + Access Key	Tab	Shift + Tab
Firefox	Alt + Shift + Access Key	Tab	Shift + Tab
Chrome	Not Supported	Tab	Shift + Tab
Safari	Alt + Access Key (Alt + Shift + Access Key)	Tab	Shift + Tab
Opera	Not Supported	Tab	Shift + Tab

Figure 3

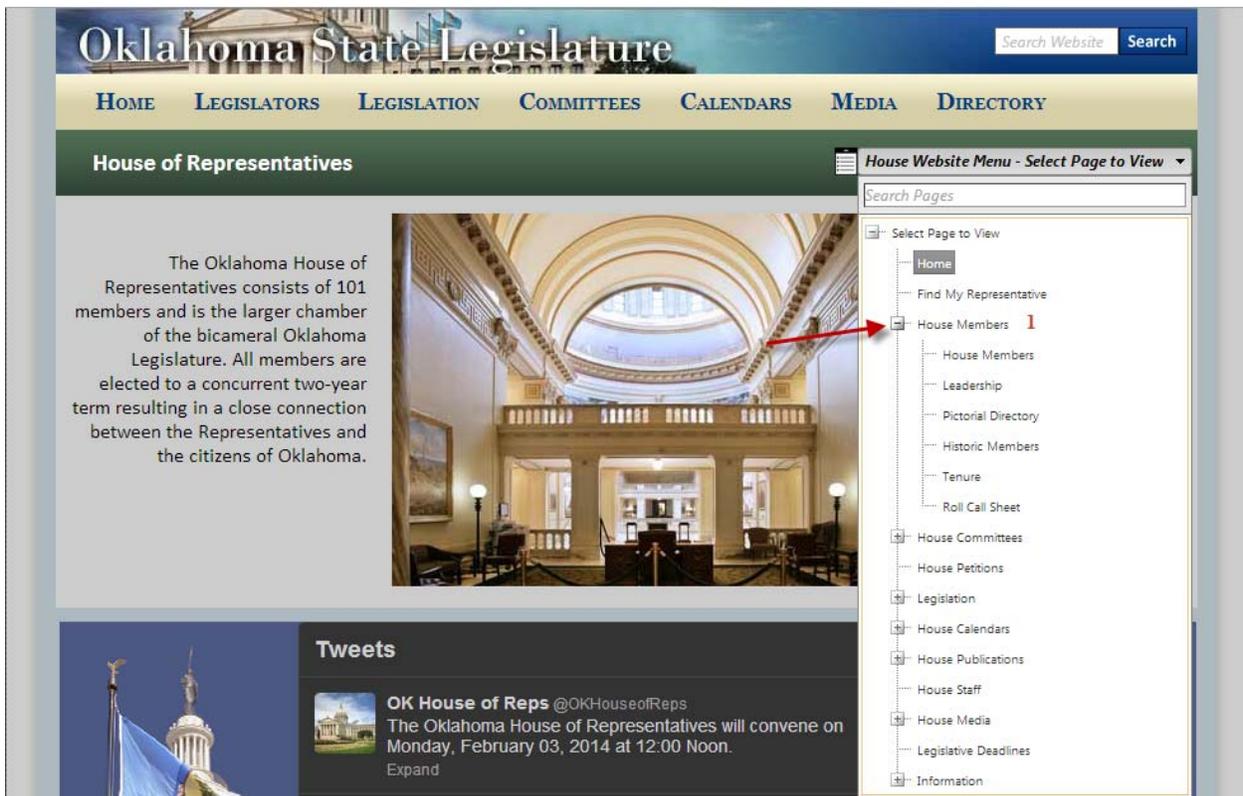

Figure 4

In figure #4 above the “House Members” menu item “+” plus sign has been clicked and the subpages available are then displayed and you can click on any of the pages to select the page that you wish to view.

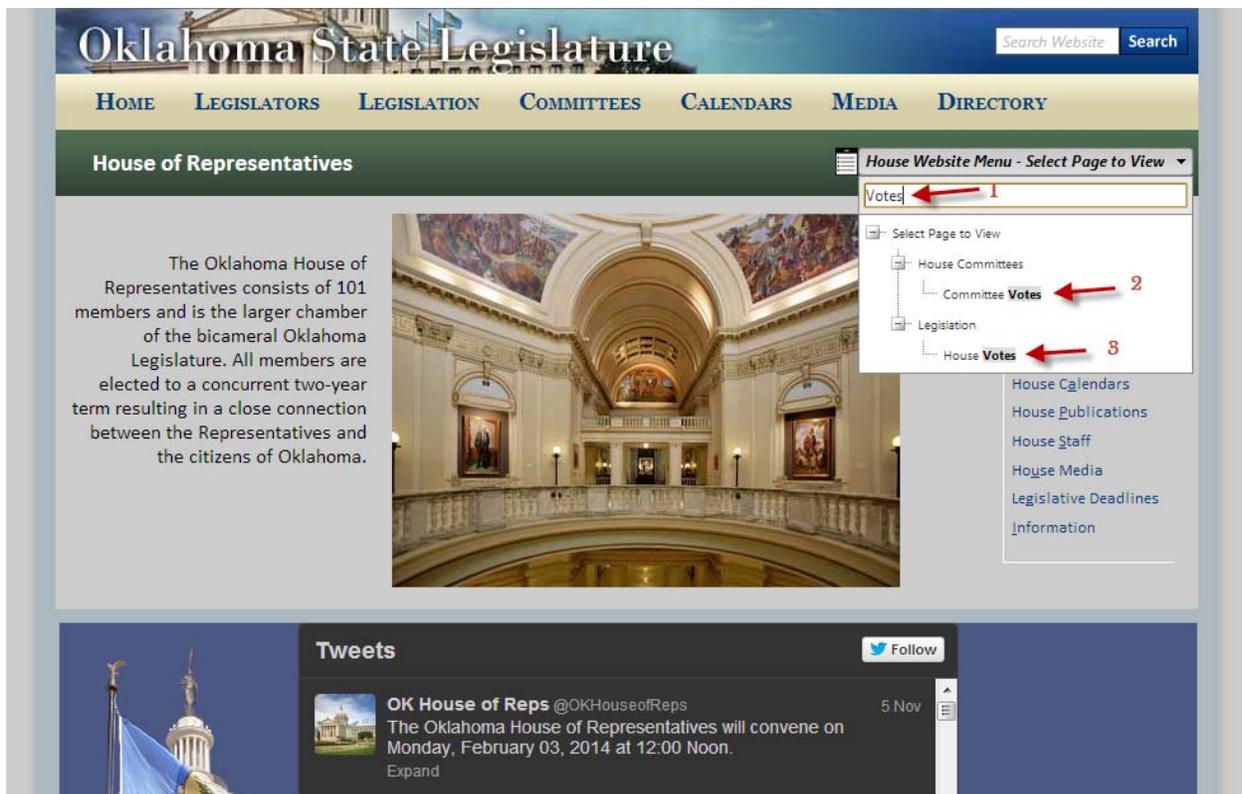

Figure 5

In figure #5 above shows how you can search for a page in the menu structure. In item #1 above we entered the word "Votes" in the "Search Pages" text box. The search is not case sensitive so you can enter upper or lower case text or a mixture. As start typing and entering the text the menu structure will start displaying the items found and you can stop at any point and select the page you are looking for. Here we entered the word "Votes" and two pages were found, items #2 and #3 above. You can then select the page you are looking for.
